Our Foremothers.

Some good-natured wag, realous for the honor of womanhood, has given utterance to the following tribate to his ancestry, on the female side. It is well worth the reading! We hear enough about forefathers. They

were nie: old fellows, no doubt. Good to work, cat or light. Very well. But where are tacir companions, their "chuns," who, as their helpmates, urged them along? Who worked and delved for our forefathers, brushed up their old clothes, and patched their brecches? Who almost involved themselves for the cause of liberty? Who nursel our forefathers when sick—sang Yankee Do, to to the babies—who trained up their Our foremothers.

Who landed at James river and came over in the Mattlower, and established thelother carly settlements? Were there not any women among them? One would think

women among them? One would think not.

Our Yankes neighbors, especialty, make a powerful talk about the Polgeim Fathers, who squatted apon Plymouth, and there is a great a lo made over it every time they wish to get up a little enthusiasm on liberty, and refresh thoraselves with erowing over freelom: and the chivalty of Virginia are from the published to the wants of the Farmer, Mechanical to the work and substantial manner, and are not a wait, behind them, when they take a morion to vaint themselves upon the glory and greatness of the Old Dominion; and greatness of the Old Dominion; and greatness of the Old Dominion; and point the most substantial manner, and are morphisms of the same of the most order of the most of the bat and of the most order of the most of the bat and of the most order of the most of the bat and of the most order of the most of the bat and of the most order of the most of the bat and of the most order of the most of the bat and of the most order of the most of the bat and of the most of the farmer, Mechanical developments of the farmer, Mechanical developments of the most of the farmer, Mechanical developments of the farmer, Mechanical developments of the farmer, Mechanical developments of the most of the most of the farmer, Mechanical developments of the farmer, Mechanical developments of the most of the farmer, Mechanical developments of the farmer, and most of the most of the farmer, and most of the most of the farmer, and most of the farmer, Mechanical developments of the most of the mo to plane themselves styly upon the meits and doings of Wm. Penn, and his associates: bit with all the blarney so plentifully dish used on all sides, what do we hear or gather about our foromothers ? Didn't they land on a rock, too? Didn't they encounter perils and hardships ? And, after all, di la't they, with their kind hearts, sust in the flagging spirits of their male con-Paulons?

Who ushere I us into the world—our forefathers? Bah! No, indeed, it was our foremothers. Who nursed George Washington. Authory Wayne, Ben Franklin, Issuel Patnam, and a host of other worthies. whose names will live forever, and taught them to be men and patriots? Diddn't our Fremothers? And who gives them the cre lit they deserve? Nobody.

We have our monuments commemorating and our speeches, our songs, our toasts, and our public dinners, colebrating the wonderful deads our forefathers but where are those in honor of our foremothers? We had better be getting them ready. We talk ourselves hourse, and write our-

selves round-shouldered, while boiling over with on husinsm at the nice things our forefuthers did, and yet nothing is said about our foremothers, to whom many a virtuous act and brave deed may be ascrib-

od, such as any hero would be proud to own.
We wish not to detract. All hail to the noble old men, our forefathers, say wo. May the glory of their deeds never be less; but the good book tells us to "render unto Cresar," etc., and we wish to speak a word in season for woman, generally, and especially, for our noble and self sacrificing forethers, lest time and the one-sided page of history shall blot them out from our
